

EXPANDED POLYSTYRENE SOLUTIONS

STYRO Parapet Moulds

Traditional wooden parapet moulds no longer exist as they were replaced by parapets made from polystyrene. The main aspect of this application is that STYRO parapet moulds are more cost effective, flexible in design, lighter in weight and faster in production since it is cut with High tech CNC machines with CAD / CAM technology.

Be it a villa, mosque, prayer hall, community hall, shopping complex and commercial or residential buildings, the elevations can't be imagined without having profiled parapets, arched entrance. Aesthetic look of the above mentioned civil structures can be enhanced with special parapet designs.
