

EXPANDED POLYSTYRENE SOLUTIONS

# STYRO Pillars & Crowns

We at STYRO make wonderful "Pillars & Crowns" for interior and exterior decoration. Our dedicated Art & Décor department carries a group of talented teams that are specialized in creating state-of-the-art sculptures from any simple concept.

STYRO EPS is a material that has many advantages over other decoration materials for interior and exterior design purposes. Some of those advantages are light weight, high performance, workable and flexible, eco-friendly and cost effective. With its non-absorbing features, STYRO EPS stands up for years of use in conditions that many other materials would not survive in.

We pride ourselves not only for exceptional high quality, but also for using the latest technology in the art and décor field in terms of expertise, passion, craftsmanship, and partnership.
