

EXPANDED POLYSTYRENE SOLUTIONS

# STYRO EIFS System EI (Exterior Insulation)

STYRO Exterior Insulation Finishing System (EIFS) is an industrial wall insulation system that consists of a lightweight insulation and thin synthetic coatings with fiber reinforcement. The insulation layer utilizes STYRO Graypor, an innovative Expanded Polystyrene product that is energy-efficient and cost-effective. It serves as the base material for the EIFS and provides excellent insulation properties. This system provides excellent thermal and acoustic insulation, which can significantly reduce your energy costs and enhance your living or working environment.

Watch the Video

### ✓ Eco Friendly:

STYRO Graypor is environment friendly material and does not harm the environment during production, use or disposal.

### ✓ Lightweight:

The system is lightweight, making it easy to handle and install and reduces the weight load on the building structure.

### ✓ Stable & Easy to Apply:

It is stable and easy to apply, allowing for smooth and efficient installation.

### ✓ Fire Retardant:

The system is designed to be fire-resistant, making it safe for use in buildings.

### ✓ Prevents Cracks Due to Expansion:

The system has a good dimensional stability and elasticity that helps to prevent cracking caused by expansion and contraction.

### ✓ Long Term R-Value:

It provides excellent insulation, helping to maintain a comfortable indoor temperature and reducing energy costs, with a long-term R-Value performance.

### ✓ CFC & HCFC Free:

STYRO products do not contain Chlorofluorocarbons (CFC) or Hydrochlorofluorocarbon (HCFC), which are harmful to the environment.
