# STYRO EIFS System ID (Insulation & Decoration)

STYRO EIFS System ID is an exterior insulation system that combines both insulation and decoration under one system. This system utilizes metal studs to extend the existing wall substrate (sheathing) to meet the design requirements of the project. It can be installed on either cement board or moisture-resistant gypsum board substrates. STYRO EIFS (ID) serves as an alternative to GRC/GRP systems and provides added value engineering to projects by reducing costs. System provides excellent energy efficiency and aesthetic appeal, making it a popular choice for modern buildings.

Watch the Video

- ✓ **Lightweight:**  
The system is light in weight, which makes it easy to handle and install, reducing the overall weight of the structure.
- ✓ **Easy to Apply:**  
The system is simple to apply, reducing manpower costs and installation time.
- ✓ **Unlimited Shapes:**  
STYRO Graypor can be moulded into any shape, allowing for more creative and unique designs.
- ✓ **Excellent Insulation:**  
The system offers excellent insulation properties, improving energy efficiency and reducing energy costs.
- ✓ **Fire Retardant:**  
The system is designed to be fire-resistant, making it safer for use in buildings.
- ✓ **High Impact Resistance:**  
The system is highly impact-resistant, making it durable and long-lasting.
- ✓ **Eco Friendly:**  
It is environment friendly, made with sustainable materials and reducing the carbon footprint of the building.
