

EXPANDED POLYSTYRENE SOLUTIONS

STYRO EIFS System MM (Mixed Media)

STYRO's Mixed Media (MM) system provides a flexible solution that meets the design and project requirements by incorporating various materials other than EPS. Materials such as cement board, gypsum board, acrylic sheet, wood, steel or any building material demanded by the project can be used. The MM system provides more design freedom to architects and engineers, allowing them to achieve their desired aesthetic look without any limitations. STYRO executes projects using mixed media materials to comply with project requirements and design factors, enabling customers to achieve their dream design.

Watch the Video

✓ Design Flexibility:

STYRO EIFS Mixed Media allows architects and designers to have the freedom to choose any building material required to achieve their desired aesthetic look.

✓ Meets Architectural Design Criteria:

The system meets all architectural design criteria and provides customized lightweight facade solutions for all interfaces.

✓ Fire Retardant:

STYRO EIFS Mixed Media is a fire retardant, making it a safe option for buildings.

✓ Low Maintenance Cost:

This system is easy to maintain and does not require frequent upkeep, saving on maintenance costs.

✓ High Impact Resistance:

The system is highly impact-resistant, making it durable and long-lasting.

✓ Eco Friendly:

It is environment friendly, made with sustainable materials and reducing the carbon footprint of the building.
