

EXPANDED POLYSTYRENE SOLUTIONS

STYRO SSS Glue

SSS known as Super Styro Stick, is a viscous adhesive that is low in volatility, non-solvent based and water-resistant. It is specifically formulated to bond Expanded Polystyrene (EPS) products due to its high bonding quality and tensile strength. However, it is also widely used in various industries, such as aluminium joinery, carpentry, upholstery production, waterproofing, construction and insulation activities. It is commonly used in art and craft, model making, toy production and decoration industries.

The adhesive is supplied in two components, a semi-liquid and a white powder, which are mixed together in equal ratios to create a paste. Apart from bonding EPS, the adhesive can also be used to bond steel, wood, concrete and other materials, making it versatile for use in various applications. The glue has been tested for fire reaction and falls under class "A" fire category as per the ASTM E-84 standard.

Scan to learn more

✓ High Bonding Strength:

SSS has superior bonding quality and tensile strength, making it ideal for various applications.

✓ Water Resistant:

It is formulated to be water-resistant, which makes it suitable for use in outdoor environments or areas where moisture is present.

✓ Fire Rated:

SSS adhesive has been tested for fire reaction and falls under class "A" fire category as per the ASTM E-84 standard, making it safe to use in applications where fire safety is a concern.

✓ Low VOC:

The glue has low volatile organic compounds, which means it is environment friendly and safer to use.

✓ Versatile:

The adhesive can bond a range of materials, including steel, wood, concrete and EPS products, making it a versatile solution for various applications.

✓ Easy to Apply:

SSS can be easily applied using a brush or roller and cures at a faster rate.

✓ Long Lasting:

The glue has a long shelf life and can maintain its bonding strength for an extended period.
