

EXPANDED POLYSTYRENE SOLUTIONS

STYRO Cinema System

STYRO Cinema System utilizes Styro EPS blocks as the ideal choice for raised cinema floors. These blocks are lightweight and distribute the load consistently, making them a practical option for cinema floors and stadium seating applications. They are easy to handle at the site and do not add weight to the existing structure, which is considered the safest construction material for this application.

The system includes EPS blocks, steel reinforcement, concrete and various finishing materials such as tiles, parquet or carpet. It provides a versatile and customizable solution for cinema, stadium and auditorium flooring needs.

Watch the Video

- ✓ Lightweight:**

It reduces the load on the existing structure, preventing further damage. It also makes it easier to handle and install, reducing the installation time and labour costs.
- ✓ Stable and Easy to Apply:**

It is stable and easy-to-apply that provides consistent load distribution, ensuring a safe and durable floor. It is also easy to install, requiring minimal site preparation and no heavy machinery.
- ✓ Good Elastic Properties:**

It allows to absorb vibrations and shocks, making it an ideal choice for floors and seating. It also helps to reduce noise and provide a comfortable cinema experience.
- ✓ Good Dimensional Stability:**

It retains its shape and size over time, even under heavy loads and high traffic areas. This ensures a long-lasting and reliable floor solution.
- ✓ Prevents Cracks Due to Expansion:**

The STYRO Cinema System is designed to prevent cracks due to expansion and contraction, ensuring a seamless and smooth floor.
- ✓ Good Insulation:**

It has good insulation properties, providing long-term R-value for floors. This helps to reduce energy consumption and costs associated with heating and cooling the cinema.
