# STYRO Soffit Insulation System with EIFS Finishing

High-quality soffit insulation system provides exceptional thermal and sound insulation, making it the perfect choice for your home or commercial space. It is a lightweight ceiling slab insulation that includes STYRO Graypor as an insulation layer, with fiber reinforcement, base coat and finishing material.

Soffits are the underside of architectural structures such as a utility area, a balcony and car parking. By insulating these areas it can provide energy efficiency benefits to the structure.

Watch the Video

- ✓ **Energy Savings:**  
Excellent thermal insulation properties that can help reduce energy costs.
- ✓ **Durability:**  
High compressive strength and dimensional stability, ensuring long-lasting performance.
- ✓ **Versatility:**  
Easy to install and can fit into any shape or size of soffit.
- ✓ **Moisture Resistance:**  
Resistant to moisture and water absorption, preventing mold and mildew growth.
- ✓ **Soundproofing:**  
Can provide acoustic insulation, reducing noise transmission from outside or inside the building.
- ✓ **Fire Safety:**  
Provides superior fire resistance and protection, ensuring the safety of the building and its occupants.
- ✓ **Aesthetics:**  
Can be used as a decorative finish on the soffit, providing a sleek and modern look to the building.
