

EXPANDED POLYSTYRENE SOLUTIONS

STYRO Roof Insulation System

STYRO Roof Insulation System is a comprehensive roofing solution that includes waterproofing, thermal insulation and finishing for the roof. It is a Combo Roof system which consists of various components, including Waterproofing, STYRO Graypor, Geotextile, Screed and Cementitious Coatings.

STYRO Roof Insulation System is compatible with all commercial roofing systems and can be used in various construction applications such as residential, commercial, industrial, institutional, agricultural, sports facilities and infrastructure projects. It provides effective thermal insulation and protects against weather damage.

Watch the Video

✓ High Compressive Strength:

High compressive strength is important for roofing systems to ensure that the insulation material does not get crushed and lose its effectiveness over time.

✓ Fire Retardant:

Fire retardancy is an essential safety feature for roofing systems. STYRO Roof Insulation System is designed to be fire retardant and it does not contribute to the spread of fire.

✓ Low Thermal Conductivity:

STYRO Graypor has low thermal conductivity, it helps to keep heat inside during cold weather and outside during hot weather. This makes it an effective insulation material that helps to regulate the temperature of buildings.

✓ Long Term R Value Retention:

The system retains its R value over the long term, ensuring that it continues to provide effective insulation over time.

✓ ODP & GWP Less than 5:

The system has an Ozone Depletion Potential (ODP) and Global Warming Potential (GWP) less than 5, meaning that it has a minimal impact on the environment.

✓ CFC & HCFC Free:

Chlorofluorocarbon (CFC) and Hydrochlorofluorocarbon (HCFC) are harmful chemicals that contribute to ozone depletion. The System is free from these chemicals, making it safe for the environment.
